EDUCATION

Tesla STEM High School

September 2022 – Now

GPA: 3.94 UW, 4.55 W; **SAT:** 1540 (780M, 760R)

Relevant Coursework: Data Structures, Advanced Projects in CS, AP Comp Sci A, AP Comp Sci Principles, Multivariable Calculus, AP Calculus AB/BC, AP Statistics, Graphic Production, Economics

EXPERIENCE

Stanford AIMI Center

Summer Research Intern

June 2024 – July 2024

- Selected as **one of 26 applicants nationwide** to partake in the annual Summer Research Internship.
- Collaborated with experts in the AI for medicine space, including Stanford professors and graduate students. Developed a lung disease classification pipeline by tokenizing radiologist reports with SpaCy and leveraging a ResNeXt-50 architecture with LibAUC optimization.
- Our team's presentation and deep learning pipeline **won first place** in the internship.

Mobile Intelligence Lab @ UW Allen School

AI Research Intern

July 2025 – September 2025

- At the MI Lab I worked on an atypical speech translation project with Professor Gollakota & a team of PhD students
- Developed **data driven insights** on ALS and Parkinson's speech patterns, **fine-tuned model** to expand its range from Cerebral Palsy to also include Parkinson's and ALS.
- Created **deployment pipeline** for model; validated performance on different devices.

Applied Programming Club

Cofounder & Vice President (25-26); Secretary (24-25)

May 2024 – Now

- The Applied Programming club strives to allow students to engage in **internship-level opportunities** with real companies
- Led full stack web development projects for Rove (YCombinator W24) and local businesses (Seattle Ski, Chavitos Barbershop) while **teaching members** front-end website development skills.
- Helped grow the club to 35+ active members over the course of two years.

MAPS Youth

Member (22-24); Leadership Officer (24-26)

September 2022 – Now

- Assisted with organizing events for an organization that benefits **>1000 Muslim youth** in the Greater Seattle area.
- Handled check-in and registration, coordinated event set-up and takedown, and reached out to local businesses for partnerships
- Helped fundraise **\$3k+** for our annual youth summer retreat

PROJECTS

Tesla STEM Job Portal

FBLA Website Coding & Development (24-25)

4 Weeks

- Created an unofficial job portal for my school that allows employers to publish job postings and users to plan and fill out applications, all under admin control. Demo: <https://stemlink.vercel.app/>
- Utilized a NextJS and Firebase tech stack, while using the Tailwind, Framer, and OpenAI libraries
- Won **1st place** at regionals and **4th place** at the state level, qualifying us to the nationals

9-1-1 Assistant

Medihacks 2024

7 Days

- Created a conversational TTS 9-1-1 responder emulator to combat lowering responder hiring rates
- Utilized a NextJS and Flask tech stack, while using Tailwind, GTTS, PyDub, and OpenAI libraries
- Won **2nd place** in the U-18 division at the hackathon

FarmFresh+

FBLA Business Plan (24-25)

8 Weeks

- Developed a startup idea for an online farmer's market. Created a business plan that included industry analysis, product mockups, supply chain design, business management documentation, and financial projections
- Pitched our business concept and presented our report to a panel of judges. Utilized NextJS and Figma for product mockups
- Won **1st place** at the state level and **2nd place** at the national level out of 200+ teams

SKILLS

Languages: Java, Python, C#, Javascript, HTML, CSS, XML, Kotlin, C++, Dart

Frameworks/Libraries: Node.js, React, MongoDB, Jetpack Compose, Matplotlib, Tensorflow, PyTorch, Heroku, Firebase

Developer Tools: Git, Github, VS Code, Cursor, Google Colab, VS, Android Studio, PyCharm
